tom:

Am

Am

F

You love the world
More than you love me
Though you mean the world to me
Today my world is collapsing
Into the void of no return

Dm

F

G

Am

Every word that come
From your mouth
Is just another sign
For me to let it go
But it takes so long
And I'm not so strong
And I miss your face every day

Am

F

You love your own god
More than you love me
Though you're a god to me
You've always wanted to protect me
But now, you're the one that hurt me

C

G

You talk to your wise men and they say

Women are only here to distract

You from your path so follow your path

Follow your track, follow your dreams

And let her down

You make big talks

And they equal

Do what I say not what I do

Am

You love yourself

F

More than you love me

Am

F

Though I love yourself more than me

Am

F

I let my ego drift away far

Am

So it won't come back

F

But now I'm losing my way

C

G

You're getting stuck

Dm

In your quest for fame

And women, and free love

F

G

C

And all your hippie theories

G

Dm

But don't pretend to be all loving

F

G

Am

If you can't treat your woman right

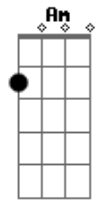

F

G

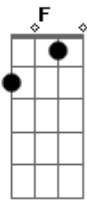

Am

Cause you didn't treat your woman right
