A
Sea full of diamonds, good morning new day
A
I'll fix us breakfast, and the newspaper says
     D                             A
The company will lay off 5,000 souls today

    A
"I wish I was a child with no worries back then", I say
  A
"Kiss me and smile..", you reply, in your way
    D                                        A
You wake up the children for school... for the last time
  D
For suddenly our beautiful life blurs away
       A
And the world breaks into pieces

( D  A  E )

Gbm        A         E    Dbm
'Cause today the sea came in
               E             Gbm
The wave came and stole my loved ones
    A          E  Dbm       E           Gbm
I write these lines alone on the rooftop of my home
      A          E  Dbm      E       Gbm
I'm adrift on the vast oceans, can you feel me?
```

```
         A        E Dbm         E
I will not see you again, even if I live through
       Gbm
The day when the sea came

(Day when the sea came..)

(Day when the sea came in..)

(  Gbm   E   Gbm )

Gbm
I trace the scenes our children once played
Gbm
Names carved in wood, all the words, bound to fade
       E
I believe, my love, your memory and dreams
                              Gbm
Deserve to live again tomorrow

          D
A
(My love...) We built this world together, we lived in here
together
                                                    D
And shared the fun together, bore the sorrows, all together
                                                      A
We'll win the fight together, we'll lose the game together
                                                    D
Greet the heroes all together, and forever, we'll remember
                                                      A
We built this world together, we lived in here together
                                                    D
And shared the fun together, bore the sorrows, all together
                                                    A
And as long as we're together, in spirit, yet together
                                                D     A
You're the air that I am kissing, you will always be there
                             D    A
I can feel you in the wind
                             D    A
I can feel you in the wind

[Final] D  A  D
