

Sting - Until

tom:

Intro: Em Gb7 Bm

If I caught the world in a bottle
 And everything was still beneath the moon
 Without your love would it shine for me?

If I was smart as Aristotle
 And understood the rings around the moon
 What would it all matter if you loved me?

In your arms
 The where the world is impossibly still
 With a million dreams to fulfill
 And a matter of moments until
 The dancing ends

Here in your arms
 When everything seems to be clear
 Not a solit'ry thing would I fear
 Except when this moment comes near
 The dancing's end

If I caught the world in an hourglass
 Saddle up the moon so we could ride
 Until the stars grew dim, until

Cm Eb G#7M
 One day, you'll meet a stranger
 And all the noise is silenced in the room
 You'll feel that you're close to some mystery

Cm Eb G#7M
 In the moonlight, when everything shadows
 You feel as if you've known her all your life
 The world's oldest lesson in history
