C

C

G

At least we tried

Oh to get along with everyone that passes us by

And I won't cry

No I won't cry for something I will have no more

A way to die

Is a salvation for leaving this world of black and white

A paradise

That's what I call the place I live

Despite of what happened before

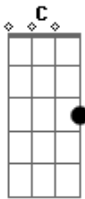

It's the place I can always call home

Don't matter what you say or what you do

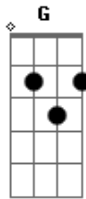

It's the place I can always call home

Don't matter what you say or what you do

It's the place where I come from  
 No more good-byes  
 And no more sorrow in our minds to make us feel the pain  
 Now it's alright  
 One by one and independency we've been looking for  
 A way to fly  
 As high as the vultures that landed in our love forever  
 I wonder why  
 I wonder why my memories don't shine so bright anymore  
 It's the place I can always call home  
 Don't matter what you say or what you do  
 It's the place I can always call home  
 Don't matter what you say or what you do  
 It's the place where I come from
