

Tabatha! - Stay

```
Everything around me 'cause you?re here with me?
                            tom:
                                                                I?m losing all my senses got to let you go
Saw you for the first time standing by the sea
                                                                'Cause now I know you?re not the one for me
Reaching for the stars and for something you can?t see
                                                                But I still want you to
                                                                [Refrão]
Gave up every second just to look at you
'Cause I was seeking something brand new and
                                                                Kiss me like you mean it make it right and stay
I wanted you
                                                                (Stay a little while with me tonight)
                                                                Baby don?t conceal it let it shine and take
Never thought I?d be so in love with your smile
                                                                (Take your time to make me feel alive)
Everything enchants me when you are around
                                                                I know I?m not that perfect and I?m a mess
You give me reasons both to stay and to move on
                                                                Inside, but I?m all you?ve ever needed
But now I?m searching for the right one
                                                                (Say you won?t let go of me tonight)
You say we?re never getting back
                                                                Leave all your lonely feelings, I?ll give you happiness
The feelings that we used to have
                                                                We?ll think about the future
But baby you know me so
                                                                And just leave the bad things in the past
[Refrão]
                                                                ( C G F ) ( C G F )
Kiss me like you mean it make it right and stay
                                                                [Terceira Parte]
(Stay a little while with me tonight)
Baby don?t conceal it let it shine and take
                                                                Maybe someday you will see
                                                                That I?m the one for you
(Take your time to make me feel alive)
I know I?m not that perfect and I?m a mess
                                                                I?m the one you need
Inside, but I?m all you?ve ever needed
                                                                Maybe someday you will come to me and say
(Say you won?t let go of me tonight)
                                                                I know you?re not that perfect
Leave all your lonely feelings, I?ll give you happiness
                                                                And you?re a mess inside
                                                                You?re all I?ve ever needed and I won?t let go of you tonight
We?ll think about the future
And just leave the bad things in the past
                                                                I?ll leave my lonely feelings I?ll give you happiness
[Segunda Parte]
                                                                We?ll think about the future and
                                                                Just leave the bad things in the past
Am I going blind or just forgot to see
                                             C
