

Taylor Swift - I Can See You

tom:
Capostrate na 4ª casa

Uh-uh, uh, uh
You brush past me in the hallway
And you don't think I, I, I can see

You, do you?
I've been watching you for ages
And I spend my time tryin' not to feel it
[Pré-Refrão]

But what would you do if I went to
Touch you now?
What would you do if they never
Found us out?
What would you do if we never made a
Sound?

[Refrão]
'Cause I can see you waitin' down
The hall from me
And I can see you up against the

Wall with me
What would you do? Baby, if you only
Knew
Yeah, I can see you
Uh-uh, uh, uh

And we kept everything
Professional, but
Something's changed, it's something
I, I like
They keep watchful eyes on us
So it's best that we move fast and
Keep quiet
You won't believe half the things
I see inside my head
Wait till you see half the
Things that haven't happened yet
[Pré-Refrão]

But what would you do if I went to
Touch you now?
What would you do if they never
Found us out?
What would you do if we never made a
Sound?

[Refrão]
'Cause I can see you waitin' down
The hall from me
And I can see you up against the

Wall with me
What would you do? Baby, if you only
Knew, oh-oh, oh, oh
Yeah, I can see you throw your

Jacket on the floor
I can see you, makes me want you

Even more
What would you do? Baby, if you only
Knew
That I can see you

(Bm G)
Uh-uh, uh, uh

[Ponte]
I can see you in your suit and your
Neck-tie
Pass me a note saying, "Meet me

Tonight"
Then we kiss and you know I
Won't ever tell, yeah
And I could see you being my

Addiction
You can see me as a secret mission
Hide away and I will stop
Behaving myself
Uh-uh, uh, uh
Oh-oh, oh, oh

[Refrão]
I can see you waitin' down the hall

From me
 And I can see you up against the
 Wall with me
 What would you do? Baby, if you only
 Knew, oh
 And I can see you throw your jacket
 On the floor
 I can see you, makes me want you
 Even more

What would you do? Baby, if you only
 Knew
 That I can see you, oh, I can see
 You
 Oh, I see you, I see you, baby
 I see you
 I see you, I see you, baby
 Oh, baby
