(see bottom of file)

bottom of file)

Continue here from "" with faster tempo.  
If you started with 400 seconds on the timer, you'll have 100 seconds remaining at this point. The game plays some riff for 6 game seconds, then it continues on with the tempo sped up considerably. (I haven't figured out the riff yet. For a cool effect, rest for a measure then play the rest twice as fast.) Go back to the "" and keep looping until you feel like beating down Mario with your guitar.

## Acordes
