# That Poppy - Software Upgrade
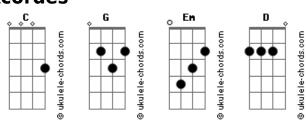

Tom:

[Primeira Parte]

```
C
You were never meant for me
   G                        Em                    G
No true capability to satisfy me in a human way
C                              G
You got the weaknesses and I have to deal with it
Em
I restart you every single day
```

[Pré-Refrão]

```
  G
I turn you off, I turn you on
      C
And off and off, and on and on
     Em                       D
And off and off, and on and on and on
```

[Refrão]

```
                  G
I think you need a software upgrade
                             C
Because you run ten minutes too late
                        Em
And I'm too cute to patiently wait
                          G
I'm getting you a software upgrade
(Software upgrade)
```

[Segunda Parte]

```
C
You're not original
      G
A true individual
      Em                            G
You only say what you're programmed to say
      C
You never make me any food
      G
And you are never in the mood
```

```
     Em                           D
So come on baby, tell me, are you gay?
```

[Pré-Refrão]

```
  G
I turn you off, I turn you on
      C
And off and off, and on and on
     Em                       D
And off and off, and on and on and on
```

[Refrão]

```
                  G
I think you need a software upgrade
                             C
Because you run ten minutes too late
                        Em
And I'm too cute to patiently wait
                          G
I'm getting you a software upgrade
(Software upgrade)
```

[Ponte]

```
Em
He's a fine, fine hologram
G
Oh, but he'll never be a real man
C
Oh, he's a fine fine hologram
D
Hey hey hey
```
[Refrão]

```
                  G
I think you need a software upgrade
                             C
Because you run ten minutes too late
                        Em
And I'm too cute to patiently wait
                          G
I'm getting you a software upgrade
(Software upgrade)
```
