

The Academy Is... - Everything We Had

Tom: D

You were the only face i'd ever known
 I was the light from the lamp on the floor
 And only as bright as you wanted me to be
 But i am no gentleman, i can be a prick
 And i do regret more than i admit
 You have been followed back to the same place i
 Sat with you drink for drink.
 Take the pain out of love, and then love won't exist
 Everything we had, everything we had
 Everything we had, everything we had
 Is no longer there
 (D7M G)
 It was the only place i'd ever known
 Turned off the light on my way out the door
 I will be watching wherever you go
 Through the eyes of a fly on the wall
 You have been followed back to the same place
 I sat with you drink for drink.

Take the pain out of love and then love won't exist

Everything we had, everything we had
 Everything we had, everything we had
 Is no longer there, longer there
 Well, you saw for yourself, the way it played out
 For you, i am blinded
 For you, i am blinded, for you
 I am no gentleman, i can be a prick
 And i do regret more than i admit
 You have been followed back to the same place
 I sat with you drink for drink
 Take the pain out of love, and then love won't exist
 Everything we had, everything we had
 (you have been followed, you have been followed)
 Everything we had, everything we had
 (you have been followed, you have been followed)
 Everything we had, everything we had
 (you have been followed, you have been followed)
 Everything we had
 I'll be with you wherever you go
 Through the eyes of a fly on the wall
