

The Big Bang Theory - The History of Everythig

Tom: G

Our whole universe was in a hot dense state,
 Then nearly fourteen billion years ago expansion started.
 Wait...
 The Earth began to cool,
 The autotrophs began to drool,
 Neanderthals developed tools,
 We built a wall (we built the pyramids),
 Math, science, history, unraveling the mysteries,
 That all started with the big bang!

"Since the dawn of man" is really not that long,
 As every galaxy was formed in less time than it takes to sing
 this song.
 A fraction of a second and the elements were made.
 The bipeds stood up straight,
 The dinosaurs all met their fate,
 They tried to leap but they were late
 And they all died (they froze their asses off)
 The oceans and pangea

See ya, wouldn't wanna be ya
 Set in motion by the same big bang!
 It all started with the big BANG!

It's expanding ever outward but one day
 It will cause the stars to go the other way,
 Collapsing ever inward, we won't be here, it wont be hurt
 Our best and brightest figure that it'll make an even bigger
 bang!

Solo: C D G D Em
 C D G D C G

Australopithecus would really have been sick of us
 Debating out while here they're catching deer (we're catching
 viruses)
 Religion or astronomy, Encarta, Deuteronomy
 It all started with the big bang!
 Music and mythology, Einstein and astrology
 It all started with the big bang!
 It all started with the big BANG!
