

## The Big Bang Theory - The History of Everythig

```
Tom: G
                                                                                                                                                                        See ya, wouldn't wanna be ya
                                                                              G D
Our whole universe was in a hot dense state,
                                                                                                                                                                        Set in motion by the same big bang!
Then nearly fourteen billion years ago expansion started.
                                                                                                                                                                        It all started with the big BANG!
The Earth began to cool,
G D Em
                                                                                                                                                                        It's expanding ever outward but one day
                                                                                                                                                                                                                                    Em
The autotrophs began to drool,
                                                                                                                                                                        It will cause the stars to go the other way,
Neanderthals developed tools,
                                                                                                                                                                        Collapsing ever inward, we won't be here, it wont be hurt
                                                                                                                                                                                                                                         Em
We built a wall (we built the pyramids), C D G D Em
                                                                                                                                                                        Our best and brightest figure that it'll make an even bigger
Math, science, history, unraveling the mysteries,
                                                                                                                                                                       Solo: C D G D Em C D G G
That all started with the big bang!
"Since the dawn of man" is really not that long, \begin{array}{cccc} & & & & & & \\ & & & & & \\ & & & & & \\ & & & & & \\ & & & & & \\ & & & & & \\ & & & & & \\ & & & & & \\ & & & & & \\ & & & & \\ & & & & \\ & & & & \\ & & & & \\ & & & & \\ & & & & \\ & & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & \\ & & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & \\ & \\ & & \\ & & \\ & & \\ & & \\ & &
                                                                                                                                                                       Australopithecus would really have been sick of us
As every galaxy was formed in less time than it takes to sing
                                                                                                                                                                        Debating out while here they're catching deer (we're catching
A fraction of a second and the elements were made.
                                                                                                                                                                        Religion or astronomy, Encarta, Deuteronomy
                                            D
The bipeds stood up straight, G D Em
                                                                                                                                                                        It all started with the big bang!
The dinosaurs all met their fate,
                                                                                                                                                                         C D G D
                                                                                                                                                                       Music and mythology, Einstein and astrology
They tried to leap but they were late \frac{G}{D}
                                                                                                                                                                           C D
                                                                                                                                                                        It all started with the big bang!
And they all died (they froze their asses off)
                                                                                                                                                                                                    D
                                                                                                                                                                        It all started with the big BANG!
                           D
The oceans and pangea
