riff 1
chords: B A D E

verse 1:
        .  . .  .
chords: B BA D E

play A right after B (listen to the song)

 soldier blue bloodstained red
 hey people it's gonna bust your head
 a real bad dream yeah you know it's true
 kiss his boots or you'll be through
 out of the night comes a soldier ridin'
 line you up in his gun sight

pre-chorus:
                    slide to A only the last time
chords: B A D E

this is played over the pre chorus

 his mind's exploded ego's overloaded
 hey children started runnin'

chorus: same as riff1 x2

 soldier blue love is out of season
 soldier blue yeah ain't fighting for no reason no no

verse 2: same as the first but the D rings out more and has small slide before it

during this last phrase
play the same thing but strike the chords between the root notes (heavy metal style)

play this over it

solo:

part 1 (play the intro)
                                love has no season
come on shake it stealer

part 2:

chords: B D E B D B

 end it here the second time

chorus:

the end uses the same chords as riff 1 but the phrasing is different
once again you must listen to the song, there's also a solo over it.
