The Fratellis - Doginabag

Tom: G

   This is my first tab so cut me a little slack it your gonna
chew me out on this comments
mail me on this site or

While that riff is being played theres another guitar that
plays the chords

  G Bb C

then play this 7 more times

then
  Bb A Ab G

After that sequence is played let the G ring and play this
over it

Then the chord sequence again
Bb x4, A x2, Ab x2, G x1

Then this again

then this once

Back to this 7 more times

then

Bb x4, A x2, Ab x2, G x1
then this

SOLO:
this is the backround of the solo

then
Bb x4, A x2, Ab x2, G x1

play this twice

the part after that I am no that sure of how its played it
comes out of that Es-335 sounding phase with

then

then this

and then it goes
Bb x4, A x2, Ab x2, G x1

then this

Play the following two above like this Chords then the riff,
so it should read out
AA G#Ab G, then play the above riff...do the whole thing 3
times

Then play this a couple of times then have a fade out effect
to lessen the sound...

Acordes
