

The Kid LAROI - Bleed

tom:

Bb (forma dos acordes no tom de A)

Capostrate na 1ª casa

Intro: F

How did your heart mend so easy?

Mine still bleeds

Hard to believe you don't need me

All those memories we made are burnin' in my brain

And I'm stuck in yesterday, for me it's still the same

Tell me how

How did your heart mend so easy?

Mine still bleeds

The ghost of you still floats around my room

It lets me know that letting go's just not the same with you

Now every night I lay here in this bed we made for two

But I'm sleepin' alone while you're out there with somebody in there

So I hope that he cares

In the way that I did, you abandoned me here

Lost up in my head again, I'm caught inside myself

You promised that it wouldn't end

But you let me, you let me down

How did your heart mend so easy?

Mine still bleeds

Hard to believe you don't need me

All those memories we made are burnin' in my brain (memories

we

Made are burnin' in my brain and I'm stuck in yesterday)

And I'm stuck in yesterday, for me it's still the same

Tell me how

How did your heart mend so easy?

Mine still bleeds

Don't give up just because it's hard

Come back and heal me before I'm left scarred

You tell me we took this too far

As soon as I let down my guard

When you needed it most, as you cried, I was soaked

Now it's weeks since we spoke, had your mom drop my clothes

And she tried to console me: The love comes and goes

And there's nothing you owe me

But you let me, you let me down

How did your heart mend so easy?

Mine still bleeds

Hard to believe you don't need me

All those memories we made are burnin' in my brain (memories we made are burnin' in my brain and I'm stuck in yesterday)

And I'm stuck in yesterday, for me it's still the same

Tell me how

How did your heart mend so easy?

Mine still bleeds
