

The Who - Doctor, Doctor

Tom: B

{intro}
 :::Abm : : :
 {bass}

:Abm : : :
 Doctor, there's something wrong with me
 : : :Eb :
 My health is not all that it used to be
 :E : : :Gb :
 My heart is out of beat, I've got chilblains on my feet
 :Eb : : :E : :Gb : :Abm :
 : : :
 My eyesight's getting dimmer, I can't see

Doctor thanks for seeing me today, I'm glad,
 I've got every sickness there is to be had
 I had whooping cough last month
 And today I've got the mumps
 And tomorrow I'll get chicken pox as well

:Ab : : :Db :
 Doctor, doctor, doctor, make me well
 :Gb : : :B :
 I've not got long to go now I can tell
 :Ab : : :Db z\\
 Doctor, doctor, doctor, make me well

:Gb :E :Gb :E
 I've not got long to go I can tell
 :Gb :E :Gb :E Gb:Abm : : :
 :
 I've not got long to go I can tell

Those pills I took had no effect at all
 Just the other day I had a nasty fall
 And I think I broke my jaw, when it hit the kitchen floor
 And I'm shrinking, last week I was five foot four

I've been getting shivers lately, is it flu?
 And though the bug is going round, what can I do?
 And it's about to pick on me, I've still got the other three
 Do you think if I caught smallpox I'd get through?

{Chorus}
 Doctor, doctor, doctor, make me well
 I've not got long to go I can tell
 Doctor, doctor, doctor, make me well
 I've not got long to go I can tell
 I've not got long to go I can tell

Do you think it's time that I made out my will?
 I'll leave everything to you to pay my bill
 Just how long is there to go;
 Please tell me, I want to know
 But on second thoughts, don't tell me, I'm too ill
