

# The Who - Doctor, Doctor

Tom: B

{intro}  
 :::Abm : : :  
 {bass}

:Abm : : :  
 Doctor, there's something wrong with me  
 : : :Eb :  
 My health is not all that it used to be  
 :E : : :Gb :  
 My heart is out of beat, I've got chilblains on my feet  
 :Eb : : :E : :Gb : :Abm :  
 : : :  
 My eyesight's getting dimmer, I can't see

Doctor thanks for seeing me today, I'm glad,  
 I've got every sickness there is to be had  
 I had whooping cough last month  
 And today I've got the mumps  
 And tomorrow I'll get chicken pox as well

:Ab : : :Db :  
 Doctor, doctor, doctor, make me well  
 :Gb : : :B :  
 I've not got long to go now I can tell  
 :Ab : : :Db z\\  
 Doctor, doctor, doctor, make me well

:Gb :E :Gb :E  
 I've not got long to go I can tell  
 :Gb :E :Gb :E Gb:Abm : : :  
 :  
 I've not got long to go I can tell

Those pills I took had no effect at all  
 Just the other day I had a nasty fall  
 And I think I broke my jaw, when it hit the kitchen floor  
 And I'm shrinking, last week I was five foot four

I've been getting shivers lately, is it flu?  
 And though the bug is going round, what can I do?  
 And it's about to pick on me, I've still got the other three  
 Do you think if I caught smallpox I'd get through?

{Chorus}  
 Doctor, doctor, doctor, make me well  
 I've not got long to go I can tell  
 Doctor, doctor, doctor, make me well  
 I've not got long to go I can tell  
 I've not got long to go I can tell

Do you think it's time that I made out my will?  
 I'll leave everything to you to pay my bill  
 Just how long is there to go;  
 Please tell me, I want to know  
 But on second thoughts, don't tell me, I'm too ill

## Acordes
