

# Theory Of A Deadman - End Of The Summer

Tom: Eb

Here we are

At the end

Say goodbye to all your friends

Here we go

watching the sun go 'round

Sitting on a rooftop making time stop

I never wanna come back down

never wanna come down

It's the end of the summer

It's the end of it all

Those days are gone, it's over now were moving on

It's the end of the summer

But we'll see it all again

So hold on 'till this moment 'till then

It's the end of the summer

Here we stand

In the middle of an empty street

Tell me where you wanna go

I'll tell you that's where I wanna be

Say goodbye to the warm breeze

We could be almost anywhere

I'll miss you 'till the next time

I hope I see you there

I hope I see you back here

It's the end of the summer

It's the end of it all

Those days are gone, it's over now were moving on

It's the end of the summer

But we'll see it all again

So hold on 'till this moment 'till then

It's the end of the summer

End of the summer

[Solo] Eb Bb Db Ab

Ride's almost over

It's getting colder

Take one last look

Before it passes by

Before it passes you by

It's the end of the summer

It's the end of it all

Those days are gone, it's over now were moving on

It's the end of the summer

But we'll see it all again

So hold on 'till this moment 'till then

It's the end of the summer

It's the end of it all

Those days are gone, it's over now were moving on

It's the end of the summer

But we'll see it all again

So hold on 'till this moment 'till then

It's the end of the summer

End of the summer
