

Thousand Foot Krutch - Be Somebody

Tom: **A**

D
I'm just the boy inside the man not exactly who you think I am
Gbm
Trying to trace my steps back here again, so many times
D
I'm just the spec inside your head, You came and made me who I am
Gbm
I remember where it all began, so clearly

D
I feel a million miles away still you connect me in your way
Gbm
And you created me something I would've never seen
D
When I could only see the floor, you made my window a door
Gbm
So when they say they don't believe, I hope that they see you in me

D
After all the lights go down I'm just the words, you are the sound
Gbm
A strange type of chemistry, how you've become a part of me
D
And when I sit alone at night, your thoughts burn through me like a fire
Gbm
You're the only one who knows who I really am

D **E**
We all wanna be somebody
Gbm **A2**
We just need a taste of who we are
D **E**
We all wanna be somebody
Gbm **A2**
We're willing to go but not that far

D **Gbm**
We're all see through just like
D2
Glass and we can shatter just as fast that light's been burned out for awhile
Gbm
I still see it every time I pass, It was lost in the corners of my mind
D
Behind a box of reasons why, I never doubted it was there

Gbm
It just took a little time to find, and even when
D
I feel a million miles away still you connect me in your way
Gbm
And you created me something I would've never seen
D
When I could only see the floor, you made my window a door
Gbm
So when they say they don't believe, I hope that they see you in me

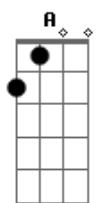

D
After all the lights go down I'm just the words, you are the sound
Gbm
A strange type of chemistry, how you've become a part of me
