

Tião Natureza - Natureza

Tom: C

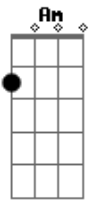

Que bola linda
 la no oriente
 parece brotar da água
 e as gaivotas acrobáticas
 ficam a dese-nhar no ar
 no a-zul mesclado de espumas brancas
 do alto vejo verde a magnetizar
 os olhos e a tela chegam
 irradiados pela luz do sol
 vejo de galho em galho
 minuci-osos corpos pularem gulosos

a be-bericar o néctar das flores
 as flores se abrem e sor-riem generosas pra ele
 que lança uma chuva dou-rada
 a cobrir as delicadas e finas faces
 as quais gravitamente
 exalam
 aroma
 areal quem deita e o sentido aconchegar
 os raios ainda entrar
 na brisa e mansa ma-tutina
 natureza
 natureza
 natu-reza
