 Colder AAAAAA
 I would show you everything
 But everything is too extreme
 We'll wait and see the entropy
 At the end when we all stop lying but
 The sky is falling down
 And there's an angel on the ground
 It's getting colder
 I'm standing looking down
 There's not a sound around the town
 It's getting colder
 The sky is falling down
 And there's an angel on the ground
 It's getting colder
 I'm standing looking down
 There's not a sound around the town
 It's getting colder
 Solo de gaita: C C7 G F
 The sky is falling down
 And all the people on the ground
 Are getting colder
 I'm standing looking down again
 But you can't help me now
 I'm getting colder
