

Travis - Safe

Tom: G

Take all the goods from all the bads
 And tell the people that you've gone away
 Now lift your head up to the sky
 And now you can tell apart the black from the white

And we waste the time they treasure dear
 And my only thought is that they could be right
 Well look there goes another year
 About as distant as a satellite

And I feel safe, so safe
 And I feel safe, so safe
 And I feel safe, so safe
 So safe

The worlds a small child in the dark
 And my mind's the same place that it's always been
 The monsters seem to fade so fast
 Upon the waking of another dream

And I feel safe, so safe
 And I feel safe, so safe
 And I feel safe, I feel so brave

I'm not afraid of anything they've got to say
 If your okay, because your tucked away
 Don't go astray

You've got to be just who you are, who you are

{Bridge: D D D D }

When I was young things didn't last
 My only cures went to the price of sweets
 Now I'm older I can laugh
 A dolly mixed up man with rotten teeth

And I feel safe, so safe
 And I feel safe, so safe
 And I feel safe, so safe
 So safe

And I feel safe, so safe
 And I feel safe, so safe
 And I feel safe, so safe
 So safe
