

Troye Sivan - Wild

```
Tom: Bb
  Trying hard not to fall
  On the way home
  You were trying to wear me down
  Kissing up on fences
  And up on walls
  On the way home
  I guess it's all working out, now
  Cause there's still too long to the weekend
  Too long till I drown in your hands
  Too long since I've been a fool
            Gm
  Leave this blue neighbourhood
 Never knew loving could hurt this good, oh
  And it drives me wild
         Gm
  Cause when you look like that
  I've never ever wanted to be so bad, oh
  It drives me wild
                          Gm
  You're driving me wild, wild, wild
                          Gm
  You're driving me wild, wild, wild
  You're driving me wild
 White noise in my mind
  Won't calm down
  You're all I think about
  Running on the music
  And night highs
  But when the light's out
  It's me and you now
  Cause there's still too long to the weekend
  Too long till I drown in your hands
  Too long since I've been a fool
```

Acordes

```
Leave this blue neighbourhood
Never knew loving could hurt this good, oh
And it drives me wild
  Gm
Cause when you look like that
I've never ever wanted to be so bad, oh
It drives me wild
                       Gm
You're driving me wild, wild, wild
You're driving me wild, wild, wild
                       Gm
You're driving me wild, wild, wild
You're driving me wild, wild, wild
You make my heart shake
Bend and break
But I can't turn away
And it's driving me wild
You're driving me wild
You make my heart shake
Bend and break
But I can't turn away
And it's driving me wild
You're driving me wild
Leave this blue neighbourhood
Never knew loving could hurt this good, oh
And it drives me wild
Cause when you look like that
I've never ever wanted to be so bad, oh
It drives me wild
                       Gm
You're driving me wild, wild, wild
                       Gm
You're driving me wild, wild, wild
You're driving me wild, wild, wild
                      Gm
You're driving me wild, wild, wild
Wi-i-i-ild, wi-i-i-ild
    Fh Bh
Wi-i-i-ild, hey!
```
