

## Vini Turola - Precious Time

```
tom:
                                                                Uh, uuhh, passed times
Intro: Am G Em D
                                                                Looking at the Moon
I so miss, to dance and drink at night
                                                                When she is very full
It was great time
                                                                Dont tell me what to do
That I didn?t want stay at home
                                                                And there of my room
I needed to see the night lights
                                                                Hum, good times
Go in the small places
                                                                I so miss, to dance and drink at night
Spend all my money
                                                                It was great time
Buying things, so silly
                                                                That I didn?t want stay at home
And I was, the happiest guy in the whole world
                                                                I needed to see the night lights
Enjoy is one of the best things
                                                                Go in the small places
To enjoy is to know how to live
                                                                Spend all my money
Fight for that
                                                                Buying things, so silly
That you could not
                                                                And I was, the happiest guy in the whole world
Take it and dont waste it
                                                                Enjoy is one of the best things
This is a great and precious time
                                                                To enjoy is to know how to live
Dont let go of your mind
                                                                Fight for that
Fight for that
                                                                That you could not
That you could not
                                                                Take it and dont waste it
Take it and dont waste it
                                                                This is a great and precious time
This is a great and precious time
                                                                Dont let go of your mind
Dont let go of your mind
                                                                Fight for that
(Dm Em F G)
                                                                That you could not
To leave in the rain
                                                                Take it and dont waste it
                                                                This is a great and precious time
Without any pain
                                                                Dont let go of your mind
My mother says my name
```

I've never been a saint

## **Acordes**

(Dm Em F G)
