

## **Vinifecampos - True Love**

```
Tom: G
                                                               You were so kind, I was so mean
                                                               But it wasn?t me (mantém o F )
Oh oh oh oh oh oh, playing with a true love
       G
                                                               Cause oh, I can?t live without You on my mind
                     Em
Oh oh oh oh oh oh, playing with a true love
I?ve been searching for something to make me shine like You do
                                                               I?ve been so lost in You
But all that I could find was myself thirsty for You

Am G Em F
                                                               Oh I know you were sent from above
Why do I have to mess it up all the time
                                                               But I?ve been such a fool
                      Em
Can I be the person You showed me one time?
                                                               Playing with a true love
Cause oh, I can?t live without You on my mind F G Am Em
And oh, I can?t breath without your loving light
                                                                          G
                                                                                     Em
I?ve been so lost in You
                                                                                              Am
                                                               Cause oh, I can?t live without You on my mind
Oh I know you were sent from above
But I?ve been such a fool
                                                                                            Am
                                                               Cause oh, I can?t live without You on my mind
Playing with a true love
                                                               Am G
Oh oh oh oh oh oh, playing with a true love
           G
                     Em
Oh oh oh oh oh, playing with a true love
                                                               Oh I know you were sent from above
                                                               Am G
Am G Em F
I thank you everyday for changing me from who I was
                                                               Playing with a true love
And now I see that everything that I need is Your love
Cause oh I was so blind, I couldn?t see, the way that
You made me believe
                                                               Oh oh oh oh oh, playing with a true love
```
