# Vittor Guidoni - No Need To Hide

Tom:

Intro: C G F C G

```
   C
You don?t wanna talk about what I already know
     G
I feel you?re keeping secrets, deep inside your soul
  F
I?m just try?na help you out, tryin? to give some hope
          C                 G
So please, listen to me

         C
You know I have been there before, I?ve paid for all my sins
   G
Oh learn you can?t just ignore, or else the pain will win
     F
We can?t just keep on living life like everything?s okay
            C         G
So trust me when I say

    C
All of my life
              G
I have been tryin? to hide
          F
So many memories, so many symphonies
               C               G
Deep, oh, inside, I know I?ve tried
     C
And all of this time
                  G
That I have been holding on my mind
                F
I?ve lost some memories, forgot all symphonies
                  C           G
They left me to die

      C
You say that we are not the same, but in the end we are
         G
Like we?re so helpless in despair, and everyone?s forgot
    F
About our little existence, in this big floating rock
           C              G
Let me help you with this

    C
All of our lives
             G
```

```
We have been tryin? to find
                  F
All types of remedies, to rescue our memories
                C                      G
Outside our minds, God knows we?ve tried
         C
And all of this time
                 F
That we have lost in our lives
             G
We fell in misery, diving so easily
                C                   G
Let us outside

    Am                         C
So please, don?t hold back on me
     G                         F
For we?ve got so much left to live
    Am                    C
Our time, is catching up on us
         G                         F
So follow me, to a place where we deserve

     C
Anyone?s life
                G
Should not be cast aside
             F
We?re a community, a single entity
              C                    G
No need to hide, we?re by your side
        C
And anyone?s time
                 G
Should be handled with pride
                    F
Since all their memories, and all their symphonies
                     C           G
Are now by their side

     C
All of my life
                G
I have been trying to fight
             F
So many injuries, but now that I am at ease
                 C               G
There?s no need to fight, no need to hide
           C     G     F     C   G    C
No need to hide
```
