

We the Lion - Found Love

Tom: G

How long can I hold on?
When my feelings are growing strong
For you, for you

When you smile, yes I notice
For a while when you show me
Your heart, your heart

And now it feels right
Every time
I knew that someday you'd be mine

Found love, the right one
The kind of that I really want
That night, I felt free
I know what you mean to me

You mean love, love, love
So much love, love, love
You mean love, love, love
To me

How far can we take this?
It's getting hard to resist it
I want you, I want you

You can try to ignore this love
But you know there's a chance for us
For good, for good

And now it feels right
Every time
I knew that someday you'd be mine

Found love, the right one
The kind of that I really want
That night, I felt free
I know what you mean to me

You mean love, love, love
So much love, love, love
You mean love, love, love
To me
Ask yourself what do you want

You never know, need to take a chance
'Till you find the one
I'll tell you what I really want
All I need is you; I really fell for you
And this feeling's true

Found love, the right one
That night, I felt free

Found love, the right one
The kind of that I really want
That night, I felt free
I know what you mean to me

You mean love, love, love
So much love, love, love
You mean love, love, love
To me

You mean love, love, love
So much love, love, love
You mean love, love, love
To me
