

# Young Lights - Pills

tom:

Intro: G Am C Em

Do you dance before you walk?

Do you sing before you talk?

Do you think before you jump?  
Love before you fuck?

Take another pill

Just to keep yourself still

Solve all your problems

At the bottom of this bottle of wine

( G Am C Em )

My brothers, my sisters

There's so much that I'm missing

I'm losing my head with all this shit

And I take another pill

Just to keep myself still

And I drink all my troubles at the bottom

Of this bottle of wine

I'm just trying to

Get, get, get through the day

Get, get, get through the day

Get, get, get through the day

Without anyone

Telling me

I'll be okay

We'll all be alright

( G Am C Em )

Hold on to something, well

Grab all you can

Cause you stole my religion

From the palm of my hand

And If I take another pill

Will it keep me still?

And I drown all my demons

At the bottom of this bottle of wine

I'm just trying to

Get, get, get through the day

Get, get, get through the day

Get, get, get through the day

Without anyone

Telling me

"You'll be okay"

We'll all be alright

We'll all be alright

We'll all be alright

We'll all be alright

We'll all be alright

We'll all be alright

We'll all be alright

We'll all be alright

We'll all be alright

I'm just trying to

Get, get, get through the day

Get, get, get through the day

Get, get, get through the day

Without anyone telling me

I'll be okay
